

## Automate. Validate. Accelerate.

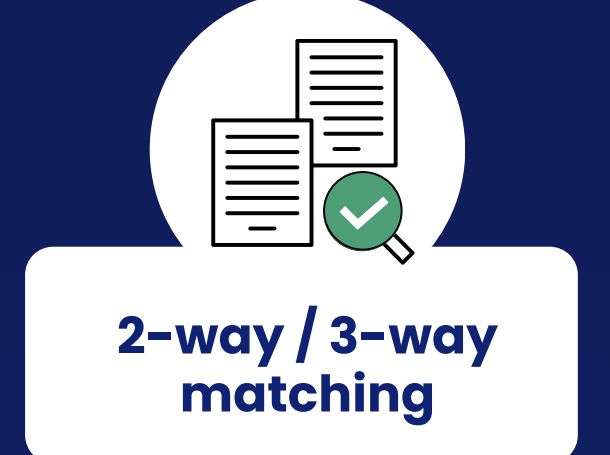

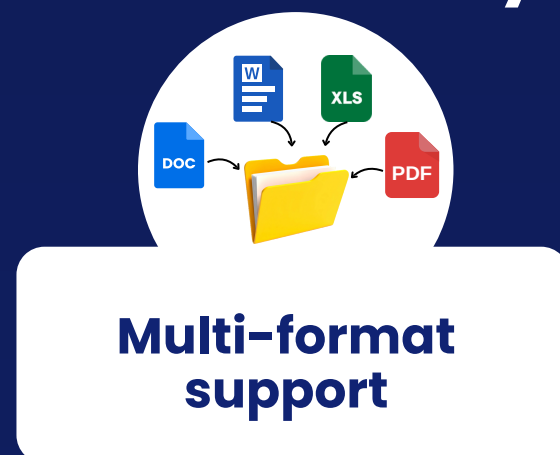

### What is Snoh Fusion?

Snoh Fusion is an AI-powered Intelligent Document Processing (IDP) platform that extracts, validates, and integrates critical data from business documents such as Invoices, POs, SOs, GRNs, KYC documents, and maintenance logs directly into enterprise systems. It eliminates manual data entry, reduces validation errors, and accelerates transaction cycles across departments.

### Business Problems We Solve

### Key Capabilities

### Use Cases

- Invoice to PO Automation (Manufacturing)
- PO to SO Automation (Retail / FMCG)
- KYC Key Information Extraction (BFSI)
- Vendor & Service Reconciliation

### Business Impact

- 60–80% reduction in manual effort
- Faster Turnaround Time (TAT) in AR/AP
- Improved transaction accuracy
- Reduced revenue leakage
- Better compliance and audit readiness

### Why Snoh Fusion?

- High-accuracy AI engine
- Seamless integration with leading ERPs
- Enterprise-grade scalability
- Flexible deployment options
- Designed for high-volume business environments

### Deployment Models

-  SaaS
-  BYOL (On-Premise, Cloud)
