

SNOH DOCS

Centralize. Control. Collaborate.

What is Snoh Docs?

Snoh Docs is an AI-powered document intelligence platform that securely centralizes, organizes, and understands business-critical documents across departments. Beyond traditional storage and versioning, Snoh Docs enables intent-based search, AI-driven summarization, contextual Q&A, and deep content discovery – even without structured metadata.

It transforms static document repositories into dynamic, accessible business intelligence.

Business Problems We Solve

- Documents are scattered across shared drives and emails
- Teams struggle to identify the latest approved version
- Critical clauses are buried inside lengthy contracts
- Compliance documents are difficult to retrieve during audits
- Search depends heavily on file names or manual tagging
- Decision-makers spend excessive time reviewing long documents

Key Capabilities

- Centralized, secure document repository
- Role-based access control
- Version history & complete audit tracking
- Advanced keyword and contextual search
- Intent-based AI search (search by meaning, not just keywords)
- Search without mandatory metadata tagging
- AI-powered document summarization
- Contextual Q&A directly from documents
- Clause-level and keyword-based extraction
- Compliance tracking and governance support

Use Cases

- Invoices, PO, GRN document management
- Vendor contract & agreement analysis
- Machine manuals & technical documentation
- SOP management
- Compliance documentation & audit readiness
- Project documentation
- Legal clause search & validation

Business Impact

- Document discovery in minutes, not hours
- Reduced compliance and audit risk
- Improved cross-department collaboration
- Organization-wide knowledge accessibility
- Lower dependency on manual tagging
- Faster, insight-driven decision-making

Why Snoh Docs?

- AI-driven document intelligence
- Enterprise-grade security architecture
- Designed for compliance-intensive industries
- Scalable for high-volume enterprise environments
- Seamless integration with automation ecosystems
