

SNOH FLOW

From Request to Approval.
Without Delays.

What is Snoh Flow?

Snoh Flow is a configurable workflow and approval automation platform that digitises, controls, and tracks business requests across departments - ensuring structured approvals, SLA adherence, and complete transparency.

It transforms manual, email-driven approvals into a controlled, auditable, and intelligent workflow system.

Business Problems We Solve

- Approvals happen over emails only
- Requests get delayed due to unclear ownership.
- Turnaround time (TAT) is unpredictable.
- Approval hierarchy is bypassed or inconsistent.
- No real-time visibility on pending requests.
- Budget overruns happen due to a lack of control.
- No consolidated view of department-wise spending.
- Documents are scattered and unavailable during audits.

Key Capabilities

- Configurable workflow builder (as per DOA)
- AI-Enabled Workflow Creation and Document Summarisation
- Role-based routing & hierarchy control
- Department / Business Unit-wise spend tracking
- Cumulative request value analysis
- Real-time dashboard reporting
- Document attachment & audit trail

Use cases

Purchase approval workflows

Maintenance request approvals

Vendor onboarding approvals

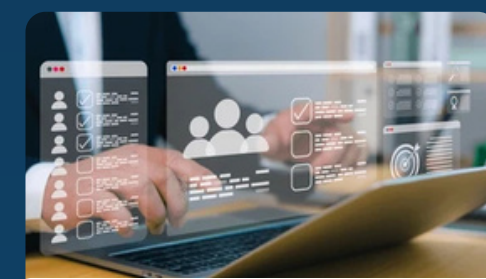

Capex approvals

Budget request management

Inter-departmental approvals

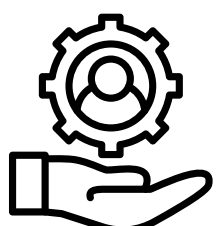

HR & admin request automation

Business Impact

Faster and structured approvals

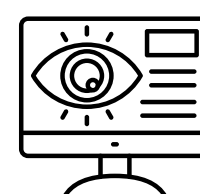

Clear accountability at every level

Reduced approval delays & bottlenecks

Stronger financial governance

Real-time visibility of requests

Improved compliance and audit readiness

Controlled budget utilisation across departments

Why choose Snoh Flow?

- Fully customizable as per Delegation of Authority (DOA)
- AI-enabled request intelligence
- Works standalone or integrated with ERP
- Designed for high-control enterprise environments
